

Naval Architecture and Ocean Engineering

Seminar

Marine Composites and Micro Autonomous Surface Vessels: Some Unusual Lessons Learned

*Textbooks and class notes provide a good foundation for engineers, but many
valuable lessons are learned away from the classroom*

13:00 - 14:30

IST, Room P8

Speaker

Paul Miller

United States Coast Guard Academy

Dr. Paul Miller is a Visiting Scholar at Tecnico. His home campus is the United States Coast Guard Academy, where he is a Professor of Naval Architecture and Marine Engineering. He earned his doctorate from the University of California at Berkeley and is a licensed Professional Engineer. He started his naval architecture career as a boatbuilder, and the first boat he designed and built sank when it was launched. Since then, he has participated in over 300 successful designs, ranging from 300 mm to 500 m in length.
