

International Conference on Maritime Technology and Engineering

The National Conferences in Naval Architecture and Marine Engineering began in 1987 with the joint organization of Instituto Superior Técnico and the Naval Architecture and Marine Engineering Section of the Portuguese Association of Engineers (Colégio de Engenharia Naval da Ordem dos Engenheiros). The 11 editions of the event were initially organized annually, becoming later a bi-annual event including one edition in 1997 organized together with the Association of Naval Architects of Spain.

The previous Conference had to be postponed 6 months and was held mostly remotely due to the COVID-19 pandemic. Based on this experience, and accounting for the possibility that some participants may not be able to be present, the MARTECH 2022 Conference will allow for remote participation, although it is expected to be held mostly in presence.

The Conference will continue to have a broad scope, covering all aspects of maritime activity including:

- Ship Design (structures, hydrodynamics, machinery)
- Ship Building and Repair
- Maritime Transportation and Ports
- Fishing and Aquaculture
- Offshore Energy Resources
- Military and Surveillance Vessels
- Recreational Craft and Maritime Tourism

The official language of the event is English. At the same time, and at the same location, the traditional national Conference will be held in Portuguese in parallel sessions.
